## 2006 Physics

## Advanced Higher

## Finalised Marking Instructions

© The Scottish Qualifications Authority 2006

The information in this publication may be reproduced to support SQA qualifications only on a non-commercial basis. If it is to be used for any other purposes written permission must be obtained from the Assessment Materials Team, Dalkeith.

Where the publication includes materials from sources other than SQA (secondary copyright), this material should only be reproduced for the purposes of examination or assessment. If it needs to be reproduced for any other purpose it is the centre's responsibility to obtain the necessary copyright clearance. SQA's Assessment Materials Team at Dalkeith may be able to direct you to the secondary sources.

These Marking Instructions have been prepared by Examination Teams for use by SQA Appointed Markers when marking External Course Assessments. This publication must not be reproduced for commercial or trade purposes.

## Detailed Marking Instructions - AH Physics 2006

## 1. Numerical Marking

(a) The fine divisions of marks shown in the marking scheme may be recorded within the body of the script beside the candidate's answer. If such marks are shown they must total to the mark in the inner margin.
(b) Negative marks or marks to be subtracted should not be shown. An inverted vee may be used instead.
(c) The number recorded should always be the marks being awarded. The number out of which a mark is scored SHOULD NEVER BE SHOWN AS A DENOMINATOR. ( $1 / 2$ mark will always mean one half mark and never 1 out of 2.)
(d) Where square ruled paper is enclosed inside answer books it should be clearly indicated that this item has been considered. Marks awarded should be transferred to the script booklet inner margin and marked G.
(e) Fractional marks, if awarded to individual questions, should be recorded in the grid, but the total script mark must be rounded up to the next whole number when transferred to the box at the top of the script.

## 2. Other Marking Symbols which may be used

| TICK | - | Correct point as detailed in scheme, includes data entry <br> Any part of answer which is wrong. (For a block of <br> wrong answer indicate zero marks.) |
| :--- | :--- | :--- |
| SCORE THROUGH | - | A point omitted which has led to a loss of marks. |
| INVERTED VEE | - | Under an answer worth marks which is wrong only <br> because a wrong answer has been carried forward from <br> a previous part. |
| WAVY LINE | - | Reference to a graph on separate paper. You MUST <br> show a mark on the graph paper and the SAME mark <br> on the script. |
| "G" |  | Wrong Physics |
| "X" | - | Wrong order of marks |

## 3. Marking Symbols which may not be used.

| "WP" | - | Marks not awarded because an apparently correct <br> answer was due to the use of "wrong physics". |
| :--- | :--- | :--- |
| "ARITH" | - | Candidate has made an arithmetic mistake. |

## 4. General Instructions (Refer to National Qualifications Booklet)

(a) No marks are allowed for a description of the wrong experiment or one which would not work.
Full marks should be given for information conveyed correctly by a sketch.
(b) Surplus answers: where a number of reasons, examples etc are asked for and a candidate gives more than the required number then wrong answers may be treated as negative and cancel out part of the previous answer.
(c) Full marks should be given for a correct answer to a numerical problem even if the steps are not shown explicitly. The part marks shown in the scheme are for use in marking partially correct answers.
(d) Where 1 mark is shown for the final answer to a numerical problem $1 / 2$ mark may be deducted for an incorrect unit.
(e) Where a final answer to a numerical problem is given in the form $3^{-6}$ instead of $3 \times 10^{-6}$ then deduct $1 / 2$ mark.
(f) Deduct $1 / 2$ mark if an answer is wrong because of an arithmetic slip.
(g) No marks should be awarded in a part question after the application of a wrong physics principle (wrong formula, wrong substitution) unless specifically allowed for in the marking scheme.
(h) In certain situations, a wrong answer to a part of a question can be carried forward within that part of the question. This would incur no further penalty provided that it is used correctly. Such situations are indicated by a horizontal dotted line in the marking instructions.

Wrong answers can always be carried forward to the next part of a question, over a solid line without penalty.
(i) $1 / 2$ mark should be awarded for selecting a formula.
(j) Where a triangle type "relationship" is written down and then not used or used incorrectly then any partial $1 / 2$ mark for a formula should not be awarded.
(k) In numerical calculations, if the correct answer is given then converted wrongly in the last line to another multiple/submultiple of the correct unit then deduct $1 / 2$ mark.
(1) Significant figures.

Data in question is given to 3 significant figures.
Correct final answer is $8 \cdot 16 \mathrm{~J}$.
Final answer $8 \cdot 2 \mathrm{~J}$ or $8 \cdot 158 \mathrm{~J}$ or $8 \cdot 1576 \mathrm{~J}$ - No penalty.
Final answer 8 J or $8 \cdot 15761 \mathrm{~J}$ - Deduct $1 / 2$ mark.
Candidates should be penalised for a final answer that includes

- three or more figures too many
or
- two or more figures too few. ie accept two higher and one lower
Max $1 / 2$ mark deduction per question
Max $21 / 2$ deduction from question paper
(m) Squaring Error

$$
\begin{aligned}
& \mathrm{E}_{\mathrm{K}}=1 / 2 \mathrm{mv}^{2}=1 / 2 \times 4 \times 2^{2}=4 \mathrm{~J}(-1 / 2, \text { ARITH }) \\
& \mathrm{E}_{\mathrm{K}}=1 / 2 \mathrm{mv}^{2}=1 / 2 \times 4 \times 2=4 \mathrm{~J}(1 / 2, \text { formula }) \text { Incorrect substitution. }
\end{aligned}
$$

The General Marking Instructions booklet should be brought to the markers' meeting.

## Physics - Marking Issues

The current in a resistor is 1.5 amperes when the potential difference across it is 7.5 volts. Calculate the resistance of the resistor.

|  | Answers | Mark +comment | Issue |
| :---: | :---: | :---: | :---: |
| 1. | $\mathrm{V}=\mathrm{IR}$ | (1/2) | Ideal Answer |
|  | $7 \cdot 5=1 \cdot 5 \mathrm{R}$ | (1/2) |  |
|  | $\mathrm{R}=5 \cdot 0 \Omega$ | (1) |  |
| 2. | $5 \cdot 0 \Omega$ | (2) Correct Answer | GMI 1 |
| 3. | $5 \cdot 0$ | (11/2) Unit missing | GMI 2(a) |
| 4. | $4 \cdot 0 \Omega$ | (0) No evidence/Wrong Answer | GMI 1 |
| 5. | $\Omega$ | (0) No final answer | GMI 1 |
| 6. | $\mathrm{R}=\frac{V}{I}=\frac{7 \cdot 5}{1.5}=4.0 \Omega$ | ( $11 / 2$ Arithmetic error | GMI 7 |
| 7. | $\mathrm{R}=\frac{V}{I}=4 \cdot 0 \Omega$ | (1/2) Formula only | GMI 4 and 1 |
| 8. | $\mathrm{R}=\frac{V}{I}=$ $\qquad$ | (1/2) Formula only | GMI 4 and 1 |
| 9. | $\mathrm{R}=\frac{V}{I}=\frac{7 \cdot 5}{1.5}=\square \Omega$ | (1) Formula + subs/No final answer | GMI 4 and 1 |
| 10. | $\mathrm{R}=\frac{V}{I}=\frac{7 \cdot 5}{1 \cdot 5}=4 \cdot 0$ | (1) Formula + substitution | GMI 2(a) and 7 |
| 11. | $\mathrm{R}=\frac{V}{I}=\frac{1 \cdot 5}{7 \cdot 5}=5 \cdot 0 \Omega$ | (1/2) Formula but wrong substitution | GMI 5 |
| 12. | $\mathrm{R}=\frac{V}{I}=\frac{75}{1 \cdot 5}=5 \cdot 0 \Omega$ | (1/2) Formula but wrong substitution | GMI 5 |
| 13. | $\mathrm{R}=\frac{I}{V}=\frac{7.5}{1.5}=5.0 \Omega$ | (0) Wrong formula | GMI 5 |
| 14. | $\begin{aligned} & \mathrm{V}=\mathrm{IR} \quad 7 \cdot 5=1 \cdot 5 \times \mathrm{R} \\ & \mathrm{R}=0 \cdot 2 \Omega \end{aligned}$ | ( $11 / 2$ Arithmetic error | GMI 7 |
| 15. | $\mathrm{V}=\mathrm{IR}$ |  |  |

$$
\mathrm{R}=\frac{I}{V}=\frac{1 \cdot 5}{7 \cdot 5}=0 \cdot 2 \Omega
$$

(1/2) Formula only
GMI 20

## Data Sheet

## Refractive Indices

The refractive indices refer to sodium light of wavelength 589 nm and to substances at a temperature of 173 K .

| Substance | Refractive index | Substance | Refractive index |
| :--- | :---: | :--- | :---: |
| Diamond | 2.42 | Glycerol | 1.47 |
| Glass | 1.51 | Water | $1 \cdot 33$ |
| Ice | 1.31 | Air | 1.00 |
| Perspex | 1.49 | Magnesium Fluoride | 1.38 |

## Spectral Lines

| Element | Wavelength/nm | Colour | Element | Wavelength/nm | Colour |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Hydrogen | $\begin{aligned} & 656 \\ & 486 \\ & 434 \\ & 410 \\ & 397 \\ & 389 \end{aligned}$ | Red <br> Blue-green <br> Blue-violet <br> Violet <br> Ultraviolet <br> Ultraviolet | Cadmium | 644 | Red |
|  |  |  |  | 509 | Green |
|  |  |  |  | 480 | Blue |
|  |  |  |  | Lasers |  |
|  |  |  | Element | Wavelength/nm | Colour |
| Sodium | 589 | Yellow | Carbon-dioxide | $\begin{gathered} 9550 \\ 10590 \end{gathered}$ | Infrared |
|  |  |  | Helium-neon | 633 | Red |

Properties of selected Materials

| Substance | $\begin{gathered} \text { Density/ } \\ \mathrm{Kg} \mathrm{~m}^{-3} \end{gathered}$ | Melting Point/K | Boiling Point/K | Specific Heat Capacity/ $\mathrm{Jkg}^{-1} K^{-1}$ | Specific Latent Heat of Fusion/ $\mathrm{Jkg}^{-1}$ | Specific latent Heat of Vaporisation/ $J k{ }^{1}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Aluminium | $2 \cdot 701 \times 10^{3}$ | 933 | 2623 | $9.02 \times 10^{2}$ | $3.95 \times 10^{5}$ |  |
| Copper | $8.96 \times 10^{3}$ | 1357 | 2853 | $3.86 \times 10^{2}$ | $2 \cdot 05 \times 10^{5}$ | .... |
| Glass | $2.60 \times 10^{3}$ | 1400 | .... | $6.70 \times 10^{2}$ |  | .... |
| Ice | $9.20 \times 10^{2}$ | 273 | .... | $2 \cdot 10 \times 10^{3}$ | $3 \cdot 34 \times 10^{5}$ |  |
| Gylcerol | $1.26 \times 10^{3}$ | 291 | 563 | $2.43 \times 10^{3}$ | $1.81 \times 10^{5}$ | $8.30 \times 10^{5}$ |
| Methanol | $7.91 \times 10^{2}$ | 175 | 338 | $2.52 \times 10^{3}$ | $9.9 \times 10^{4}$ | $1 \cdot 12 \times 10^{6}$ |
| Sea Water | $1.02 \times 10^{3}$ | 264 | 377 | $3.93 \times 10^{3}$ |  |  |
| Water | $1.00 \times 10^{2}$ | 273 | 373 | $4 \cdot 19 \times 10^{3}$ | $3 \cdot 34 \times 10^{5}$ | $2 \cdot 26 \times 10^{6}$ |
| Air | $1 \cdot 29$ | .... | $\ldots$ |  | .... |  |
| Hydrogen | $9.0 \times 10^{-2}$ | 14 | 20 | $1.43 \times 10^{4}$ | .... | $4.50 \times 10^{5}$ |
| Nitrogen | $1 \cdot 25$ | 63 | 77 | $1.04 \times 10^{3}$ | $\ldots$ | $2.00 \times 10^{5}$ |
| Oxygen | $1 \cdot 43$ | 55 | 90 | $9 \cdot 18 \times 10^{2}$ | $\ldots$ | $2.40 \times 10^{5}$ |

The gas densities refer to a temperature of 273 K and pressure of $1.01 \times 10^{5} \mathrm{~Pa}$.
